PLANNING POSTCARD STATEHOOD SOUVENIR

The Statehood Celebration is to have a distinctive souvenir postcard. Robert Page is having a number of designs made for the official souvenir eard which will be distributed by the merchants among the guests of the city who come here to attend the celebration.

The cards will be in three series and will be used in advertising the celebration by enclosing them as inserts in the business mail of a number of the leading merchants of the city.

The wisdom of the ages has produced no other remedy to equal S.S. for the BLOOD

There have been many new "blood remedies" placed upon the market since S. S. S. came into existence more than forty years ago. A great many of these were "fads" for a short period, some were introduced as "miraculous wonder workers," while others claimed to have the endorsement of the scientific world. But they failed in the real test and were unable to accomplish results credited to them, so one by one they have passed out of existence.

How different is the record of S. S. S.; this medicine has succeeded because it possesses merit; it cures blood diseases because it is a real blood purifier, composed of the most active and reliable ingredients. The length of time S. S. S. has been on the market, and the fact that more of it is manufactured and sold each succeding year,

proves its genuine worth beyond question.

S. S. S. is especially successful in the treatment of that peculiar blood disease so dreaded by humanity because of its stubborn nature and distressing symptoms. So intense is the virus of this trouble that it quickly permeates the entire blood supply, and usually produces such symptoms as ulcerated mouth and throat, brown splotches on the skin, gradual loss of hair, pains in the limbs, skin eruptions, etc. S. S. S. has cured many thousands of the most aggravated cases; and it always cures permanently. It goes down into the blood and removes all germs, virus and poisons, and one who has been cured by the use of S. S. S. need not fear any future breaking out of the malady.

No other medicine acts with such satisfactory results in these cases as S. S. S. It is made entirely of roots, herbs and barks, each of which possesses blood purifying and tonic properties. This medicine takes hold of the disease at once by going directly into the circulation, and beginning the necessary work of driving the powerful virus from the blood. S. S. S. is thorough in its service; it leaves no trace of the old trouble, and when it cures, the blood is in perfect condition. S. S. S. may be used with absolute safety; it will not unpleasantly affect the stomach, bowels, or any other portion of the system. S. S. S. is the greatest of all blood purifiers and it cures because of this fact. If you are afflicted with this disease do notwaste valuable time with experimental medicines, but write for our Instructive Treatment book and let us send you an abundance of proof that S. S. S. is the remedy most certain to cure you. No charge for the book or any special medical advice that may be desired. S. S. S. is for sale at drug stores.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Many Denouncements Made and Capital Being Sent to Sonora

Cananea, Son., Mex., Sept. 27 .- Conditions in Cananas and in fact throughout the entire state are netter at present than they have been for some time. It is predicted that after the presidential election, which occurs on the first of the coming month, that everything will again liven up and that there will be more capital invested in Mexico mines than ever before, in Cananca conditions are excellent and the Cananca Consolidated Conper company (Greene-Consolidated Copper company (Greene-Cananea) is working almost full ca-pacity. It is predicted that the output for the present month will surpass that of August, which was 5,569,000 pounds of bilster copper. The large output is due partly to the handling of the Miami concentrates.

concentrates.

During the past week a number of capitalists, well known in the copper world, visited Cananea. The party included John D. Ryan, of Cole-Ryan fame: Wm. E. Corey, a director in the Calumet and Arisona company: P. L. Foster, of the London Exploration company: W. D. Thornton, president of the Greene Conpolidated Copper company, and R. L. Agisses, of the Calumet and Heckla. After a few days here they went to Ray, Aria. None of the members of their visit save that it was of an inspection nature.

bers of the party would state the cause of their visit save that it was of an inspection nature.

August Fritsche, vice prosident and general manager of the Mexican Metals company, who is at present located in Cananen to oversee the operations of the property of the concern, which will begin in earnest in a about time, states that the roads, which have been damaged commiderably by the rains of the past few years, are now being repaired and that some of the machinery is being moved and placed ready for the resuming of operations.

The Cananea-Boston property was the scene of a small ore find this week. In sinking the shaft several stringers of rich ore were encountered at a depth of about \$2 feet. For the preceding week the ground has been changing, lending atrength to the opinion that a large cre body is in close proximity of the shaft. Considering the small amount of work already done on the property. It is showing up excellently and is almost certain of becoming a producer of no small callber. The work is being done economically, it being financed by local parties, and with as much speed as possible.

Lamparos Deal.

financed by local parties, and with as much speed as possible.

Lamparos Deal.

Reports have been received here to the effect that there is a deal pending for the sale of the Lamparos silver property, controled by Rishee, Aris, parties at present a party of Fremont, O. men is at the mine accompanied by F. D. Borgenson, a mining engineer, of Mexico City, The property is considered a good one and has been worked to some extent by the company holding it, under the management of F. R. Harrington, Considerable ore has been uncovered which gives nigh sliver contents.

tents.
The San Felipe Mining company, The San Felipe Mining company, operating the old Reselito property, on the Yaoui river, near the town of Realito, is at present making arrangements to work the property in a thorough maturer. Considerable new machinery which has been purchased arrived at the property recently, and all will be in shape for operation in four or fire weeks. It consists of a steam plant, holst, compressor, drills, turbine generator, ice plant, etc. As soon as the outfit is installed work will commence on a new two compartment shaft, which will be sunk to at

turbine generator, les plant, etc. As soon as the outfit is installed work will commence on a new two compartment shaft, which will be sunk to at least a depth of 396 feet, at which point drifts will be ren to intersect the old antigua workings. The company is composed of Charlestown, W. Va. people and a party of men from that dity interested in the property, passed through Cananea recently bound for the property, are at present there. J. L. Sheperd is general manager.

Numerous Denouncements.

There seems to be no sad in the denouncing of mining properties in Sonora, and more denouncements are pouring in at the mineral office at Hermosillo delly until one would believe that half of the population is in the mining business at present The following denouncements give as idea of the great number of claims filed on recedity: O. H. Glover has denounced elight pertonencias under the name Orleatil, situated mane El Tucabe mine, municipality of Cucurpe, district of Masginlena, for gold and silver. F. C. Rodriguez, of Nacozari, three pertenencias, under name La Vaquera, Cumpas, Mostecuma, for gold and silver, also three pertenencias, under name La Vaquera. Cumpas, Mostecuma, gold and silver, also three pertenencias, under name San Nicolas No. I. Cumpas, Mostecuma, gold and silver, Ed Botsford, 60 pertenencias, under name San Nicolas No. I. Velasco, seven pertenencias, under name Vulcan de Oro, on Espinas ranch, Santa Ana, Magdalena, gold, silver and copper, P. Yanes, 10 pertenencias, under name El Hallazgo, near Good Enough and Creaton de Oro mines, Cumpas, Magdalena, gold and silver. M. Apalategui, 12 pertenencias, under name Albwri, Oputo, Moctezuma, gold and silver M. Tamayo, six nertenencias, under name San Francisco, Soyona, Ures, gold, silver and copper, R. Mariscal, eight pertenencias, under name La Reforma, on Martinez ranch, Altar, gold and silver,

It will be sored that almost every denouncement is for gold and silver, which shows in a forceful manner to what the mining man is devoling his attention. Copper since is not sought for at present, the precious metals being the lode stone attracting all. In Alamos District.

Durango Property Is Show-

ing Up Well-Improvements Are Planned Torreon, Coah., Mex., Sept. 27 .- The

first shipment of silver-lead builton from the Reyes Mining and Smelting company's new smelter at Reyes, Durango, passed through this city this week en route to Monterey. Aside from good silver values this bullion carries high values in gold, the Reyes camp being one of the principal gold producers of the country. This shipment of builton is almost entirely from the area of the various mines owned by the same company as the smelter. The stockholders are largely composed of Torreon people who are rejoicing over

Torreon people who are rejoicing over the evident success of this enterprise. The smelter is of 50 tons daily capacity and was built by to fil Paso Foundry and Machine company. The plant was recently inspected by an expert representing the state of Rurango, prior to awarding the 10 years' concession, and it was pronounced complete in every detail.

Aside from the carload of builling shipped, a car of first class ore was recently sent to the Torreon smelter which was liquidated at over \$2500. A large tonnage of ore is also in the smelter yards for treatment is Reyes as soon as a new supply of fuel can be as soon as a new supply of fuel can be

New Mines Taken Up, New Mines Taken Up.
Engineer J. P. Steele, who is operating the Montenessas mines in the San Diego mining district, near Velardena, has recently applied for titles to a number of new mining claims in that district. Mr. Steele is preparing to increase his assumpton to the steele in the steele in the steele is preparing to increase his assumpton to the steele in the

BOHEMIAN MINE MAKES SHIPMENT

Ore Is Brought to El Paso Smelter; Other Shipments Prepared

Highls l'Tepared
James T. O'Hara, president and general manager of the Chloride Flat Mines
company, the owner of the Bohemian
mine, consisting of two full claims, for
which the company paid \$55,000, situsted between the Baltic and Bremen's
old mine, called the 76, just above Silver
City, N. M., is in El Paso, having two
carleads of nigh grade ore at the El
Paso smetter, and will ship three more
carloads of the same ore this week to
El Paso.

carloads of the same ore this week to El Paso.

He says that the ore runs from 15 ounces to as high as 2000 ounces to the ton. It is a carbonate ore, and is excellent for fluxing. The company has two large deposits of ore, one 10 feet thick by 15 feet wide, another shot 20 feet wide and three feet thick, both of which are still going. both of which are still going.

He says there are bodies of ore in sight in the shaft that the company is now shinking which has already at-alned a depth of 195 feet. The shaft is equipped with modern hoisting manufacture.

Chinery.

He also says that his company is endeavoring to purchase from Mrs. Bremen the 16 and the Bremen, both of which are short claims, also the Baltic, which is a full claim. These three claims adjoin the Bohemlan.

The company has a force of 40 men at work and has taken over the Casey mine, in the Chloride mining district, in the Black Range, New Mexico. At present this mine is furnishing very

RICH GOLD FOUND ON ALPINE LAND

Company Is Expected to Develop the Property There Soon

Alpine, Texas, Sept. 27.—A vein of rich gold-bearing quartz was discovered here within three miles of the Alpine courthouse on land belonging to A. S. Gage, the San Antonio capitalist. The town was filling up with practical miners, and these are now returning to their former locations. An operating company was formed and required 1990 feet square space at a point in one of the Gage pastures near the city, Mr. Gage to receive a percentage of the of the Cage pastures near the city, Mr. Gage to receive a percentage of the net proceeds of the mine. Later, however, the prospectors claim that Mg. Gage was not willing to grant a concession for more than 1500 feet. Further developments in the negotiations with Mr. Gage, who is now here, are awaited with keen interest.

WILL IMPROVE THE WHITE OAKS FIELD

Coal and Iron Deposits to Be Prospected and a Railroad Built

Carrizozo, N. M. Sept. 27.—A movement is on foot here to develop the
cost and from fields of White Oaka. A
public meeting will be held to discuss
ways and means of raising funds to
build a railroad from Carrizozo to
White Oaks. Some coal operators of
Birroingham, Ala., have been interested
in the project and have promised to
raise the money if a satisfactory showing is made by the people here. Six
miles of railroad would be necessary
to connect the mines at White Oaks to connect the mines at White Oaks with the main line at Robsart.

MINING PAPER TO BOOST CELEBRATION

The Southweatern Mining Review, the new monthly publication covering the metal development in the southwest, will make its appearance for the first time in El Paso on October I. The Review will be a Statehood Celebration number and will be Hiustrated and will contain a number of special articles on the mineral resources of the section represented in the great circle having El Paso as its center.

ROSENA COMPANY MAKES

SHIPMENT OF ITS ORES.

At Whitewater, which is situated not far from Silver City to the south-east, in Grant county, New Mexico, the Rosena Mining company, composed of Silver City people who took ever the old Timmer rilver mines near that place, has shipped two cars of high grade ore to BI Pase and has another car ready for shipment.

SHAFT IN THE RUTH MINES SHAFT IN THE RUTH MINES

IS BEING SUNK RAPIDLY.

C. D. Bichardson, manager of the
Enth mine, Mohave county, Arizona,
reports that the shaft has reached to
fest below the old level, and that three
shifts of miners are driving it towards
the 200 level with great rapidity. In
the drift from the hundred foot, great
ore bodies are being encountered.

BEEBE MAKES STRIKE.

It is reported that George Beebe has struck rich ore in his mine near the Tennessee in Mohave county. A small streak running through the center of the vein gives returns of more than \$5000 gold and large values in sliver. The ore is heavy iron sulphide, very much unlike anything in that section. The balance of the vein marries gold values, but the rich streak will make the entire vein workabla. BEEBE MAKES STRIKE. the entire vein workable.

Statistics For the Past Year Show a Remarkable

Improvement

Washington, D. C., Sept. 27.-The production of coal for the last year from the mines of New Mexico showed a notable increase over that of former

a notable increase over that of former years. According to E. W. Parker, of the United States geological survey, the output for 1910 was 3,508,321 short tons, with a value of \$4,877,151, as against 2,801,128 tons in 1909, a gain of 707,193 short tons, or 25.25 percent. The record for both these years was the best ever attained. The value of the product increased from \$2,619,744 to \$4,877,151, whigh is a gain of \$1,-257,407, or nearly \$5 percent.

Chuse of Increase.

The increased production of cost in New Mexico is attributed partly to the strike in the coal mines of the middle slates and the northern (Boulder) district of Colorado, and partly to the growth of population and the settlement of new lands in New Mexico, Arizona and California—settlement that is creating a demand that is permanent and growing. Both the bituminous and the subbituminous coals of New Mexico are rapidly growing in favor for domestic purposes, as is noticed by the shipment of coal from the Raton fields to markets in Kansas, Okinhoma, and even farther east, and the subbituminous coal of the Gallup district supplying the markets of the southwest and the Pacific coast. The domestic demand for New Mexico coal in 1916 was so great that it was impossible to fill all orders promptly.

Reduction of Freight Rates.
One of the benefits to the coal min-Reduction of Freight Rates.

all orders promptly.

Reduction of Freight Rates.
One of the benefits to the coal mining industry of New Mexico was the
reduction in the freight rates on foreigh coals by the Mexican railroads.
When the Mexican government took
the control of the railroads of that
country it increased the freight rates
on foreign coal in the hope of encouraging the development of the Mexican
coal mines. As the railroads had considerable coal on hand they were able
to farnish a sufficient supply of fuel
during 1916, but when these reserves
were exhausted it was found that the
Mexican mines could not supply the
dismands of the railroads and the other
industries also. In order to meet this
deficiency, the Mexican government reduced the freight on coal to the old
rate, thus reopening the Mexican market to New Mexican coal, and it is
not probable that any further attempt
will be made to exclude foreign coals
from that republic.
During 1910 the methods of operatom that republic.
During 1910 the methods of operat.

colfax Important District Colfax Important District.
Colfax county, which contains the few Mexican portion of the Raton-rinidad field is by far the most important coal producing county in New Jexico, contributing over 75 percent of the total production and more than to percent of the total increase of the total forces.

The first record of coal production in New Mexico was contained in the first report of the United States geological survey of mineral resources of the United States, which covered the calendar year of 1882. In that year 1882 to 1928 the total production has the output was only 155,092 tons. From which, including mining and other loss, represents a total exhaustion of the original supply of about 48,000,000 tons. Estimate of Supply.

According to the estimates of Marius R. Campbell, of the United States geological survey, the original coal supply.

R. Campbell, of the United States geo-logical survey, the original coal supply of New Mexico was 162,780,000,000 tons, so that the exhaustion to date repre-sents approximately .63 of one percent of the original supply. Mr. Campbell's figures do not however, include the content of several newly discovered and extensive fields. From these figures it may easily be seen that New Mexico is still in pes-session of an enormous coal reserve.

STRIKE IS MADE ON
THE SANTATNEZ PROPERTY
Interest has been attracted to the Pachuca district of Mexico by a rich strike recently made by the Santa Ynez Carrera y Annexas company, in its mine there, in a crossent that was being run at the main shaft, at a depth of about 800 feet, a body of high grade ore was encountered.

The new mill of the Santa Grirud's company, at San Guillerme, in the Pachuca district, is turning out about 3500,000 worth of bullion a morth. The company contemplates installing two more tube mills, which will give the plant an output of 30 bars of buillion per day. The company is carrying on extensive development in its mines and has blocked out great quantities of good ore.

BIG PINE COMPANY WILL.

The Big Pine Mining company in the Hassaymips district, 10 miles south of Prescrit, Ariz, will instal a cyanide plant to treat at least 100 tons of ore a day. Several hundred tons of this ore treated at the company's mill gave an average return of \$12 per ton. A winze is being sunk in tunnel number three, and is down 15 feat in a four foot body of ore. The length of the tunnel is now 150 feet. The three lower tunnels will be connected by a system of raises which are now going ahead.
